

FARHEEN SULTANA

Data Modeler · Data Engineer · Full-Stack Software Engineer

Hyderabad, India | +91-6281926353 | farheensultana0615@gmail.com | [linkedin.com/in/farheen-sultana-54723a254](https://www.linkedin.com/in/farheen-sultana-54723a254) | github.com/FarheenSultana0615 | farheenos.vercel.app

PROFESSIONAL SUMMARY

Data Modeler and Engineer with production experience in enterprise Erwin modeling, medallion pipeline architecture (bronze→silver→gold), and cloud application development on Snowflake and Databricks. Consistently hired on delivery — progressed from web developer to full-stack engineer to data modeler by solving real problems in production environments. Brings a governance-first mindset to data architecture, currently applying it to a public healthcare data pipeline built with dbt and Erwin.

TECHNICAL SKILLS

Data Modeling	Erwin (Conceptual / Logical / Physical), Medallion Architecture, STTM Documentation, Schema Design
Data Engineering	ETL/ELT Pipeline Design, Data Quality Validation, dbt (advancing), PySpark (advancing)
Cloud & Platforms	Snowflake, Databricks, AWS, Azure Fundamentals — Certified
Languages	Python, SQL, JavaScript, TypeScript, Node.js
Databases	MongoDB, PostgreSQL, DuckDB, SQL Server
DevOps & Security	Git, GitHub, Docker, REST/FastAPI, OAuth, Key-Pair Authentication, CAB Deployment Workflows

PROFESSIONAL EXPERIENCE

Data Modeler & Software Engineer · Hiffai Tech Solutions

Nov 2025 – Present | Hyderabad, India

- Designed enterprise Erwin data models (conceptual, logical, physical) across bronze→silver→gold medallion pipelines for production data workflows.
- Built and deployed a Python-based STTM Document Automation Tool actively used in production, replacing manual documentation processes.
- Developed production Node.js applications integrating Snowflake and Databricks with OAuth, key-pair, and password-based authentication systems.
- Managed end-to-end data operations including CAB ticket handling and deployment coordination in a governance-compliant enterprise environment.
- Promoted from freelance contractor to full-time hire after independently delivering a production React + TypeScript application.

Web Developer Intern · Sam Data Services

Jan 2025 – Nov 2025 | Hyderabad, India

- Led QA and regression testing across a full software release cycle; identified and resolved pre-launch defects.
- Developed and maintained .NET company website with SEO-optimised pages; delivered WooCommerce e-commerce site with payment gateway integration.

TECHNICAL PROJECTS

- Healthcare Governance Pipeline** — dbt + Erwin medallion pipeline combining WHO Global Health Observatory data (180+ countries) with NDAP India disease datasets. Bronze layer live. Applies upstream governance practices to real, ungoverned public health data. Ongoing.
- Auto STTM Engine** — Production Python automation tool generating Source-to-Target Mapping documentation from live Snowflake and Databricks schema metadata.
- Naming Compliance Engine** — Node.js + MongoDB application enforcing enterprise data asset naming conventions with OAuth and secure licensing flows.

- **Network Intrusion Detection System** — ANN classifier achieving 98.46% accuracy on the NSL-KDD benchmark dataset.

EDUCATION

Bachelor of Computer Applications (BCA) — Osmania University, Hyderabad

Expected Jun 2026

CGPA: 8.5 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Azure Fundamentals — Certified
- Databricks Data Engineer Associate — Scheduled Aug 2026
- McKinsey Forward Program — Alumni
- Deloitte Forage — Technology Consulting Virtual Internship
